

## Online Loading Management System

The Lodge Management System is an application that will maintain all the Lodge details that are present in a particular region and also provides fooding with a reasonable cost for users at any time. The users can enjoy with all the accommodations available. The customers can login to the application with their username and Password. Only the authenticated users will have the access to the website. All the room details, customer details, room types, different lodge records, staff details etc can be maintained through this application. The User interface must be simple and easy to understand even by the common man. This will be one of the applications that will help the customer to get the details of the lodges of their choice in just one mouse click.
