# Online Retail Management System

In computer accessories management system, it store records of suppliers, hardware, software, sale, purchase and customer's records are maintained and manipulated. There is no some investigation are involved to find out to correctly done the work. Generally these work are done and managed, manually hence leading to the chances of human errors that may create some problems. Thus, a secured and reliable system is required to handle it. Computer sales and services center will be a whole sale center whose main product will be to provide all the latest model computers, laptops and all the accessories related to them. This center will also deal in all the branded desktop computers and laptops. As this is also a service center so it will provide all the technical consulting which includes repair. The company will focus on marketing, responsiveness, quality, and creating and retaining customer relations. Computer sales and service will keep one or two pieces of each item initially and will provide the item in bulk on order. As the company sale will increase then the company will hire a store room and will keep the products in bulk. The company will hire one technician initially as the demand of our services will increase we will hire more technicians and skilled persons to provide all the services at the customer door step
