

Put A QR code in Your Class Room

Quick Response (QR) codes can tie all this together. QR Code is the trademark name for the two-dimensional barcode system. It's the black-and-white square that's on everything from advertisements to inventory. QR codes hold 100 times more data than one-dimensional barcodes and they can be digitally scanned. To check students, her details, a unique QR code is generated and assigned to each student. QR codes can be read scanning the code with a smartphone or tablet
